What is Logish?	03
Token Economics	03
Roadmap	04

Once upon a time, in a faraway space something was born. A team of highly experienced developers actively working in the field since 2017 with strong connections with well-known personalities and marketers in the crypto space decided to create the ultimate **community-driven, fully decentralized marketplace and Streaming Platform in the NFT Space with full Web3 Integration, called: Logish Coin**

They have been tracking and learning about everyone and everything to give people the ability to play and earn money, while they stream! The platform is under development and is fully decentralized and integrated with Web 3 streaming services. We have a unique operating model we have been updating for the past 12 months! Our platform will have multi-chain transactions, staking and our own wallet! CMC and CG will be fast tracked, the team has connections with one of the biggest names and marketing will be one of it's kind. With Multichain yield farming and Trading and Staking applications being under plans this is your chance to jump on the next big thing!

Token Economics:

Total Supply: 1000000000

Pre-sale 60%

Marketing : 5%

CEX : 15%

Team : 5%

Game: 5%

Staking 10%:
